About Us

Eskaplast is a strong flexible packaging manufacturer where knowledge and experience meet customer satisfaction, with its ever-increasing investments, state-of-the-art machinery equipment and dynamic team.

With its high quality products and customer-oriented service approach, in its new Green Building certified production facility with a total area of 29,000 m2, including 16000 m2 open and 13000 m2 closed area, with over 150 experienced employees, Eskaplast has an annual production capacity of 350.000.000 ready-made bags and over 3000 tons of rolls suitable for automatic filling. It is proud to carry its local success globally by delivering its products to more than 55 countries on 5 continents.

In Eskaplast's business approach that always aims for the better; Customers' and consumers' expectations are as important as technological developments. Providing suitable solutions for brands of all sizes with its wide product range, Eskaplast continues to make a difference by contributing to the commercial success of its customers and consumers' access to the right products.

OUR VISION

To be a leading flexible packaging manufacturer in all markets within our sphere of influence, with our qualified team and strong infrastructure. To maintain the reputation and trust we have gained by offering our wide range of products to our customers at high quality standards.

Our Mission

By combining functionality and the marketing effect, to produce packaging that represents our brand in the strongest way while preserving the products for a long time and in a healthy way.

ESQUALITY: "QUALITY with the Eskaplast Difference"

Most packaging manufacturers say they care about quality. Nevertheless, Eskaplast, which produces packaging for many sectors, especially food, pet food and medical industry, has taken the concept of quality one step further. We describe this concept as ESQUALITY. Product sterilization and the safe continuation of food freshness for the longest time form the basis of the ESQUALITY approach. ESQUALITY focuses on the highest standards in terms of functionality and food safety.

R&D

Eskaplast, which carries out the R&D process entirely with its in-house experts and experienced engineers, analyzes all components in the production process one by one. It applies a scientific packaging development-improvement process.

Innovation and Dynamism

R&D and quality processes are guiding for Eskaplast. In addition to the demands and expectations of our customers, following the latest developments in our field in the world gives us ideas for new expansions. For example, Eskaplast was one of the first to produce Flat Bottom pouches, which is new and popular for Turkiye. Eskaplast's acclaimed Flat Bottom works played a role in the adoption and popularization of this packaging type.

Tale of the good product

GOOD PACKAGING GOOD PRODUCT

RIGHT PRODUCT

In line with customer's need necessary technique analyzes and needs will meet the right product we provide.

INTERNATIONAL BUSINESS NETWORK

We work with the world's leading packaging experts and introduce you to innovative packaging.

COST EFFECTIVE

We offer the right products in the packaging market with our creative approach, therefore we grant the most suitable and competitive prices.

TEAM SPIRIT

As ESKA Ambalaj, we work with the team spirit that we have created with our expert team, who have adopted the philosophy of "human touch" in order to reach our goals.

FAST DELIVERY

We completely eliminate the on-time delivery problem, which is often experienced in the packaging industry.

DOYPACK

DOYPACK

MATT WHITE ALUMINUM DOYPACK WITH ZIPPER

- ▶ **Thanks to the matte lacquer, a partial matte appearance can be achieved.**
- ▶ Varies from single to multiple layers.
- ▶ **It provides low labor cost and high efficiency.**
- ▶ It extends the shelf life of the product inside.

ASSISTING TOOLS

Manual heat sealing m/c

It is very durable thanks to its iron body. It seals your pouches 40 cm long and 2 mm wide and provides long shelf life.

Date coding m/c

It has 1 year warranty. It is made of 304 stainless steel. It has 4 line encoding feature. It has a sealing width of 12 mm.

Bag closure clips

It allows the product to be used repeatedly and also the bag to be opened and closed easily.

Valve

The CO₂ gas generated by the coffee beans should be discharged from the inside of the pouch, while at the same time oxygen and water vapour should not be allowed into the package. You can do all of these operations with the valve.
